LI: <https://www.linkedin.com/in/abdul-malik-akorede/>

I have a background in client-facing roles, where I honed my interpersonal skills and thrived under tight deadlines. Recently completing a coding traineeship as a full-stack developer, I successfully delivered two real-world projects using various programming languages. With a genuine passion for technology and problem-solving, I find development to be a natural fit. I excel both in collaborative team environments and as a self-disciplined individual. Maintaining a positive mindset, I approach challenges with enthusiasm and continuously seek to expand my skill set. Committed to a long-term career in development, I am eager to contribute to the industry's growth.

EDUCATION

Full-Stack Engineer Professional Certification

Codecademy

2023

During the traineeship I had to demonstrate a very competent level of the following programming languages and technical skills •
HTML5, CSS3, JavaScript, PHP, SQL, React, Git and API

ECA - Physical computing (2:1)

The Brilliant Club

2013

Bsc Accounting – 2:1

Birkbeck University of London

2015 to 2018

DEVELOPMENT EXPERIENCE

Portfolio Project #1 - Gazetteer

The Gazetteer Project is a SPA web app using HTML, CSS, and JavaScript for the frontend, Leaflet.js for maps, and PHP for the backend. It provides country information, including population, borders, capital, currency, and flags, using OpenWeatherMap API for weather data and Pexels API for images based on user-selected locations. Link to the project and git repository can be found on my portfolio website or in the following link - <https://malikakorede.co.uk/gazetteer>.

Portfolio Project #2 - Wedding Invitation Project

My wedding invitation website was my inaugural project, and a venture that truly resonated with my passion. This Multi-Page Application (MPA) is designed to offer users a comprehensive experience, providing detailed information about the couple, the wedding invitation, a captivating gallery, and a streamlined RSVP system. Through a secure API, the website manages RSVP submissions, validating guests with a unique invitation reference. Additionally, it facilitates the collection of RSVP responses and enables guests to specify their preferred menu choices for the special day. Link to my git repository for this project can be found on my portfolio website.

Key Skills

Excellent Interpersonal skills
Detail-Orientated
Excellent time management
Team Working
Microsoft Excel
Outlook

Front-End: HTML5, CSS3 , Responsive Web Design, JS
Back-End: PHP, Node.js
Database Management: SQL
Version Control: Git, GitHub
Web Development Frameworks: React
APIs and Server-Side Development: RESTful API design,
Server-side scripting

WORK EXPERIENCE
